236 George St. Unit A
Barrington, IL 60010

I am just deeply disturbed with this. Looking at school busses go over the tracks over 400 times a day – this includes regular school buses and activity busses from elementary through high school. Emergency transportation – getting people to the hospital. Fire trucks, police cars. Public safety as a whole and the congestion. Deep concern for environmental pollution as well. No to even mention the economic impact this will have on all of our properties.

It would be less of an impact if they rerouted around the Barrington Community.
